

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million. The number of people who are malnourished has increased from 1.2 billion to 1.5 billion. The number of people who are obese has increased from 100 million to 300 million.

There is a growing awareness of the need to address the problem of malnutrition. The World Health Organization (WHO) has launched a global strategy to reduce malnutrition. The strategy is based on three pillars: (1) improving the quality of food, (2) increasing the availability of food, and (3) improving the access to food.

The WHO strategy is based on the following principles: (1) food should be safe, (2) food should be nutritious, (3) food should be available, and (4) food should be accessible. The WHO strategy is based on the following principles: (1) food should be safe, (2) food should be nutritious, (3) food should be available, and (4) food should be accessible.
